

MOHAMMAD KHATIB

Automation Engineer · AI Workflow Specialist

Hebron, Palestine · 056-624-3357 · moh477677@gmail.com

PROFESSIONAL SUMMARY

IT student at Palestine Polytechnic University specializing in workflow automation with n8n, AI-powered integrations, and WordPress web development. Hands-on experience building multi-step automations that connect APIs, trigger AI processing, and sync data across business tools. Passionate about bridge the gap between websites and intelligent automation pipelines.

WORK EXPERIENCE

SiteEase – Freelance Web Development & Automation

June 2025 – Present

Self-initiated project · Ongoing

- Designed and delivered WordPress websites for clients, handling layout, content structure, and basic SEO configuration.
- Built multi-step n8n workflows connecting Gmail, Google Sheets, WooCommerce, and OpenAI API to automate e-commerce operations and client communication.
- Developed an n8n pipeline that calls the OpenAI API to auto-generate product descriptions and email drafts, reducing manual writing time significantly.

Darry Agency – Digital Marketing & Automation Intern

June 2025

Summer Internship

- Built workflow automations integrating Gmail with Google Sheets using n8n to streamline lead tracking and follow-up processes.
- Created competitor analysis reports using AI tools (ChatGPT, Claude) to extract positioning insights and content gaps.
- Worked within a CRM system and built dashboards in Excel and Google Sheets to track campaign performance.

KEY PROJECTS

AI-Powered E-commerce Automation Pipeline

n8n · OpenAI API · WooCommerce

- Designed a multi-node n8n workflow triggered by a WooCommerce webhook that passes new product data to the OpenAI API, receives generated descriptions, and pushes them back to the store automatically.
- Integrated conditional logic and error-handling nodes to manage API failures and format output correctly before writing to Google Sheets.

Gmail → Sheets Lead Tracker

n8n · Gmail API · Google Sheets

- Built an automated pipeline that monitors a Gmail inbox, extracts structured lead data from incoming emails, and appends rows to a Google Sheet in real time — eliminating manual data entry.

SKILLS

Automation & Integration: n8n (multi-step workflows, webhooks, APIs, conditional logic), REST APIs, JSON

AI Tools: OpenAI API (GPT-4), Prompt Engineering, Claude, AI-assisted content & analysis

Web Development: WordPress (site building, WooCommerce, plugins), basic HTML/CSS

Design & UI/UX: Figma, Adobe Illustrator

Data & Productivity: Google Sheets, Excel (dashboards), Microsoft Office

EDUCATION

Bachelor of Information Technology – Palestine Polytechnic University

2023 – 2027 (Expected)

- Coursework: Programming & Problem Solving, Data Structures, Operating Systems & Networks, Database Design, Software Analysis, Human–Computer Interaction, Discrete Mathematics.

High School Diploma – Al-Khalil Industrial School

2022 – 2023
